**DRILL TUBES**

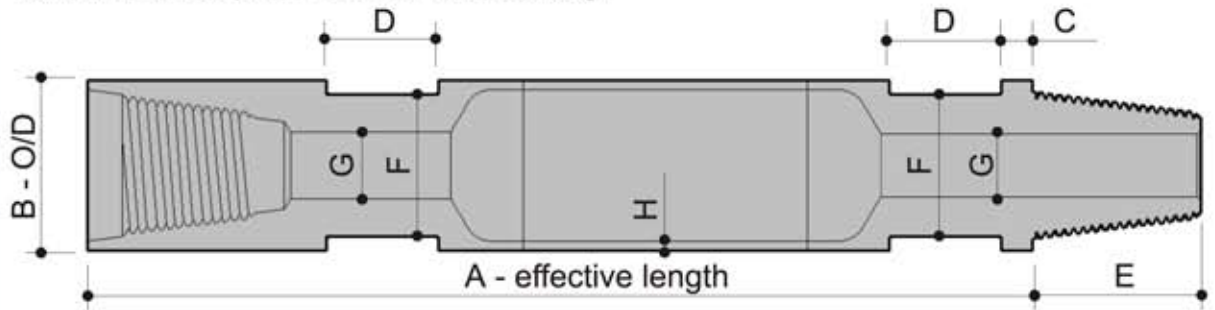

# Bulroc Drill Tubes

Bulroc drill tubes are produced from high quality seamless pipe having the thinnest wall section material consistent with the necessary strength to give the closest ratio of weight to durability.

Tool joints of high alloy steel are nitrided to provide a hard wearing surface for longer thread life.

All Bulroc drill tubes are friction welded to give the strongest and most consistent form of welding to ensure long life and dependability.

Thread protectors are fitted to both pin and box ends of all Bulroc drill tubes which are finished with a protective surface coating.

This represents the standard range of Bulroc drill tubes but other lengths and wall thickness can be supplied subject to minimum order quantity. Bulroc drill tubes are also available with special tool joints to suit the requirements of specific drill rig carousel arrangements including Bohler, Hausherr, Halco etc.
